

JOSHUA PRINI

Paris, France

joshuaprini@gmail.com joshuaprini.com [LinkedIn](#) [GitHub](#)

OBJECTIVE

Final-year Software Architecture student (ESGI, Paris) seeking a software development apprenticeship (*alternance*), available immediately. Two full-stack internships shipping features in distributed teams.

EDUCATION

Bachelor in Computer Science – Software Architecture (3rd year)	2026 – 2027
ESGI – École Supérieure de Génie Informatique, Paris	
Bachelor Informatique et Développement (Years 1 & 2)	2024 – 2026
IPSSI – Grande École Informatique, Paris	

SKILLS

Programming Languages	TypeScript, JavaScript, Python, Rust, Go, C#, C, C++, PHP, HTML, CSS
Frameworks & Tools	React, Node.js, Express, Symfony, Twig, Bootstrap, Docker, Git/GitHub
Systems & Infrastructure	Linux, Windows Server, ESXi, Proxmox, Kubernetes, GitHub Actions
Languages	French (Native), English (Fluent), Italian (Fluent)

EXPERIENCE

Full Stack Developer Intern	Jun 2026 – Aug 2026
AI transcription platform – Confidential (NDA) <i>Remote</i>	
- Developed full-stack features on an AI-powered transcription and summarization platform (Go backend, React frontend) under NDA - Built LLM prompt-template and domain-vocabulary management features (CRUD endpoints, React UI, database seeding) through a spec-first workflow with feature branches, pull requests, and code review - Evaluated PWA vs. native iOS (Swift/SwiftUI) trade-offs for mobile audio capture	
Full Stack Developer Intern	Aug 2025 – Oct 2025
YES IAM FREE – Free S-Cool Project <i>Remote</i>	
- Delivered 15 production commits in a Symfony/PHP and Twig/CSS/JS stack, contributing about 34% of DEV branch commits during Aug–Oct 2025 - Built the initial multi-page frontend and migrated assets into a deploy-ready public structure - Redesigned the homepage and standardized reusable content cards (armory, events, news, podcasts) for stronger incomplete-data handling - Added backend controllers (Gallery, Shop) to move key pages from static templates to dynamic rendering - Expanded registration and user profile fields (address, city, postal code, phone) with 3 aligned Doctrine migrations - Acted as point of contact for technical decisions across the distributed remote team; improved local onboarding via Docker tooling and documentation	

PROJECTS

REVIEWEO (github.com/bloxyj/REVIEWEO). Full-stack music review platform: Expo Router frontend, PHP 8.2 REST API, MySQL 8.4. JWT auth, review interactions, discovery charts; containerized with Nginx and Docker Compose.

Game API (github.com/bloxyj/game-api). Undertale-inspired API and demo frontend (Node.js, Express, MongoDB, JWT auth); average latency reduced to 120ms under load tests.

Obsidian Tracker Widget (github.com/bloxyj/Obsidian-Tracker-Scriptable-Widget). Lightweight iOS Scriptable widget integrating with Obsidian for note tracking and progress monitoring.

MeowFish (work in progress). Chess engine in C: UCI-compatible, alpha-beta search, benchmarks.

EXTRA-CURRICULAR ACTIVITIES

- Actively explore and contribute to open-source projects, focusing on developer tools and web technologies.
